

Has your business stopped using **free** webmail like Yahoo mail, Hotmail and Gmail yet?

Are you meeting federal and state **data compliance** requirements?

Do you have a **disaster recovery policy** for your data?

Do you know **who** has administrator access to your server(s)?

Is your **antivirus** software up to date?

Is your wireless network **secure** and encrypted?

Is your IP address, domain or ISP free from **“black-listings?”**

Is your network free of **spyware and key loggers?**

Do you know if your firewall is **configured correctly** to prevent intrusions and hacking?

Are you able to **monitor** and restrict what websites your employees visit?

Are you able to access your computer network from a **remote** location?

Does your network have the latest operating system **updates** and application patches?

Is your **network information** organized?

Is your e-mail inbox free of **spam** and joke mail?

Is your web browser free of pop-ups and **annoying** ads?

Are your data backups being kept **offsite** in case of a disaster or emergency?

Would your business records **survive** if a fire, vandalism or flood destroyed your server's data?

Do you have control of the Instant Messaging on your network?

Do you have a preventative maintenance **contract** for your server(s) and network?

If you answered a resounding **“No”** or **“I don't know”** to 3 or more of the questions above, we recommend a technology network assessment from **TCG America**. Call us today at 859.272.0080. You may also e-mail a TCG America representative at sales@tcgamerica.com

TCG America Technology Solutions

At TCG America, we believe in **protecting the perimeter** to prevent threats from ever reaching your network. Viruses, malware, spam, spyware, hacking tools, worms, blended threats, "adult" web content, and other online risks should be stopped before it ever reaches your servers.

Our hosted managed services provide **asset management, network reporting and 24/7 monitoring of your servers** at a low monthly cost. Minimize your downtime and increase the productivity of your network.

Our Spam Terminator service provides **e-mail spam & virus filtering** for your business e-mail at a low annual rate. Get back control of your network.

Backup / Disaster Recovery Solutions

Is your data vulnerable to fire, flood, natural disasters, server crashes, defective tapes, theft or accidental deletions? Our disaster recovery options include services that can provide fast recovery for your most important business asset: **your data**. Don't wait. Call today.

About TCG America

Let US be your IT Staff...
