

The TCG Managed SpamTerminator Service

Effective low cost filtered e-mail service for your business

Email communications are essential to getting the job done in today's business world, but many companies are overwhelmed by spam, the security risks of e-mail borne viruses and worms and liability implications of e-mail containing pornography or other undesirable content. It's getting harder and harder for network administrators to keep it all under control.

And if you're in a regulated industry, you may have no choice: communications containing clients' personal information, medical records, financial data and so forth must, by law, be secured.

TCG America provides enterprise hosted services for filtered e-mail management and security.

Managed E-Mail Spam Filtering Service

TCG America SpamTerminator specifications

The TCG America Managed SpamTerminator Service provides a powerful, easy to use, and affordable solution to eliminating spam and virus from your organization by providing the following protection:

- Anti-spam
- Anti-virus
- Anti-spoofing
- Anti-phishing
- Anti-spyware (Attachments)
- Denial of Service

The TCG America Managed SpamTerminator solution provides complete protection of your email server. It protects your email server with ten defense layers:

- Denial of service and security protection
- IP block list
- Rate control
- Virus check with archive decompression
- Barracuda virus check
- User-specified rules
- Spam fingerprint check
- Intention analysis
- Bayesian analysis
- Rule-based scoring

The TCG America Managed SpamTerminator service architecture optimizes the processing of each email to maximize performance and process millions of messages per day. Unlike software solutions, the service reduces the load placed on your email server by off-loading both spam and virus filtering.

In addition, the TCG America SpamTerminator service includes essential outbound filtering techniques including attachment scanning, virus filtering, rate controls and encryption. These features help organizations to ensure that all outgoing email is legitimate and virus-free.

Why a managed e-mail spam filtering service?

Small businesses now have a managed service option for securing their email system specially designed to meet their requirements. Ideal for organizations with 2 to 50 users, TCG America provides small and medium size businesses with:

- Outsourced managed service optimized for the special needs of small to medium size businesses.
- Fast and easy to activate.
- Multiple layer email protection stops spam, viruses, phishing, directory harvest attacks and other threats.
- Low monthly or annual fee, with the ability to add users as needed. **No hardware cost!**

As a managed service, spam and newly evolving email threats are effectively dealt with before they have a chance to impact your email system.

Anti-spam - The algorithms and methods used are the most comprehensive and most advanced in the industry at detecting and filtering spam resulting in the lowest rate of false positives.

Anti-virus - By utilizing dual layer virus blocking, decompression of archives and file type blocking, the anti-virus protection provides complete virus protection.

Anti-spoofing - This technology prevents the use of forged or "spoofed" sender addresses on unsolicited email.

Anti-phishing - The service provides robust protection against phishing schemes which are often used to gather confidential information about an organization or it's individual users.

Anti-spyware (Attachments) - All attachments are scanned and any spyware executables are detected and eliminated immediately.

Denial of Service Protection Rate controls are utilized to stop denial of service attacks as well as dictionary based spam attacks. These rate control systems are integrated and automatic with the TCG America SpamTerminator service.

Monthly pricing is only \$2/month per address!

859.272.0080

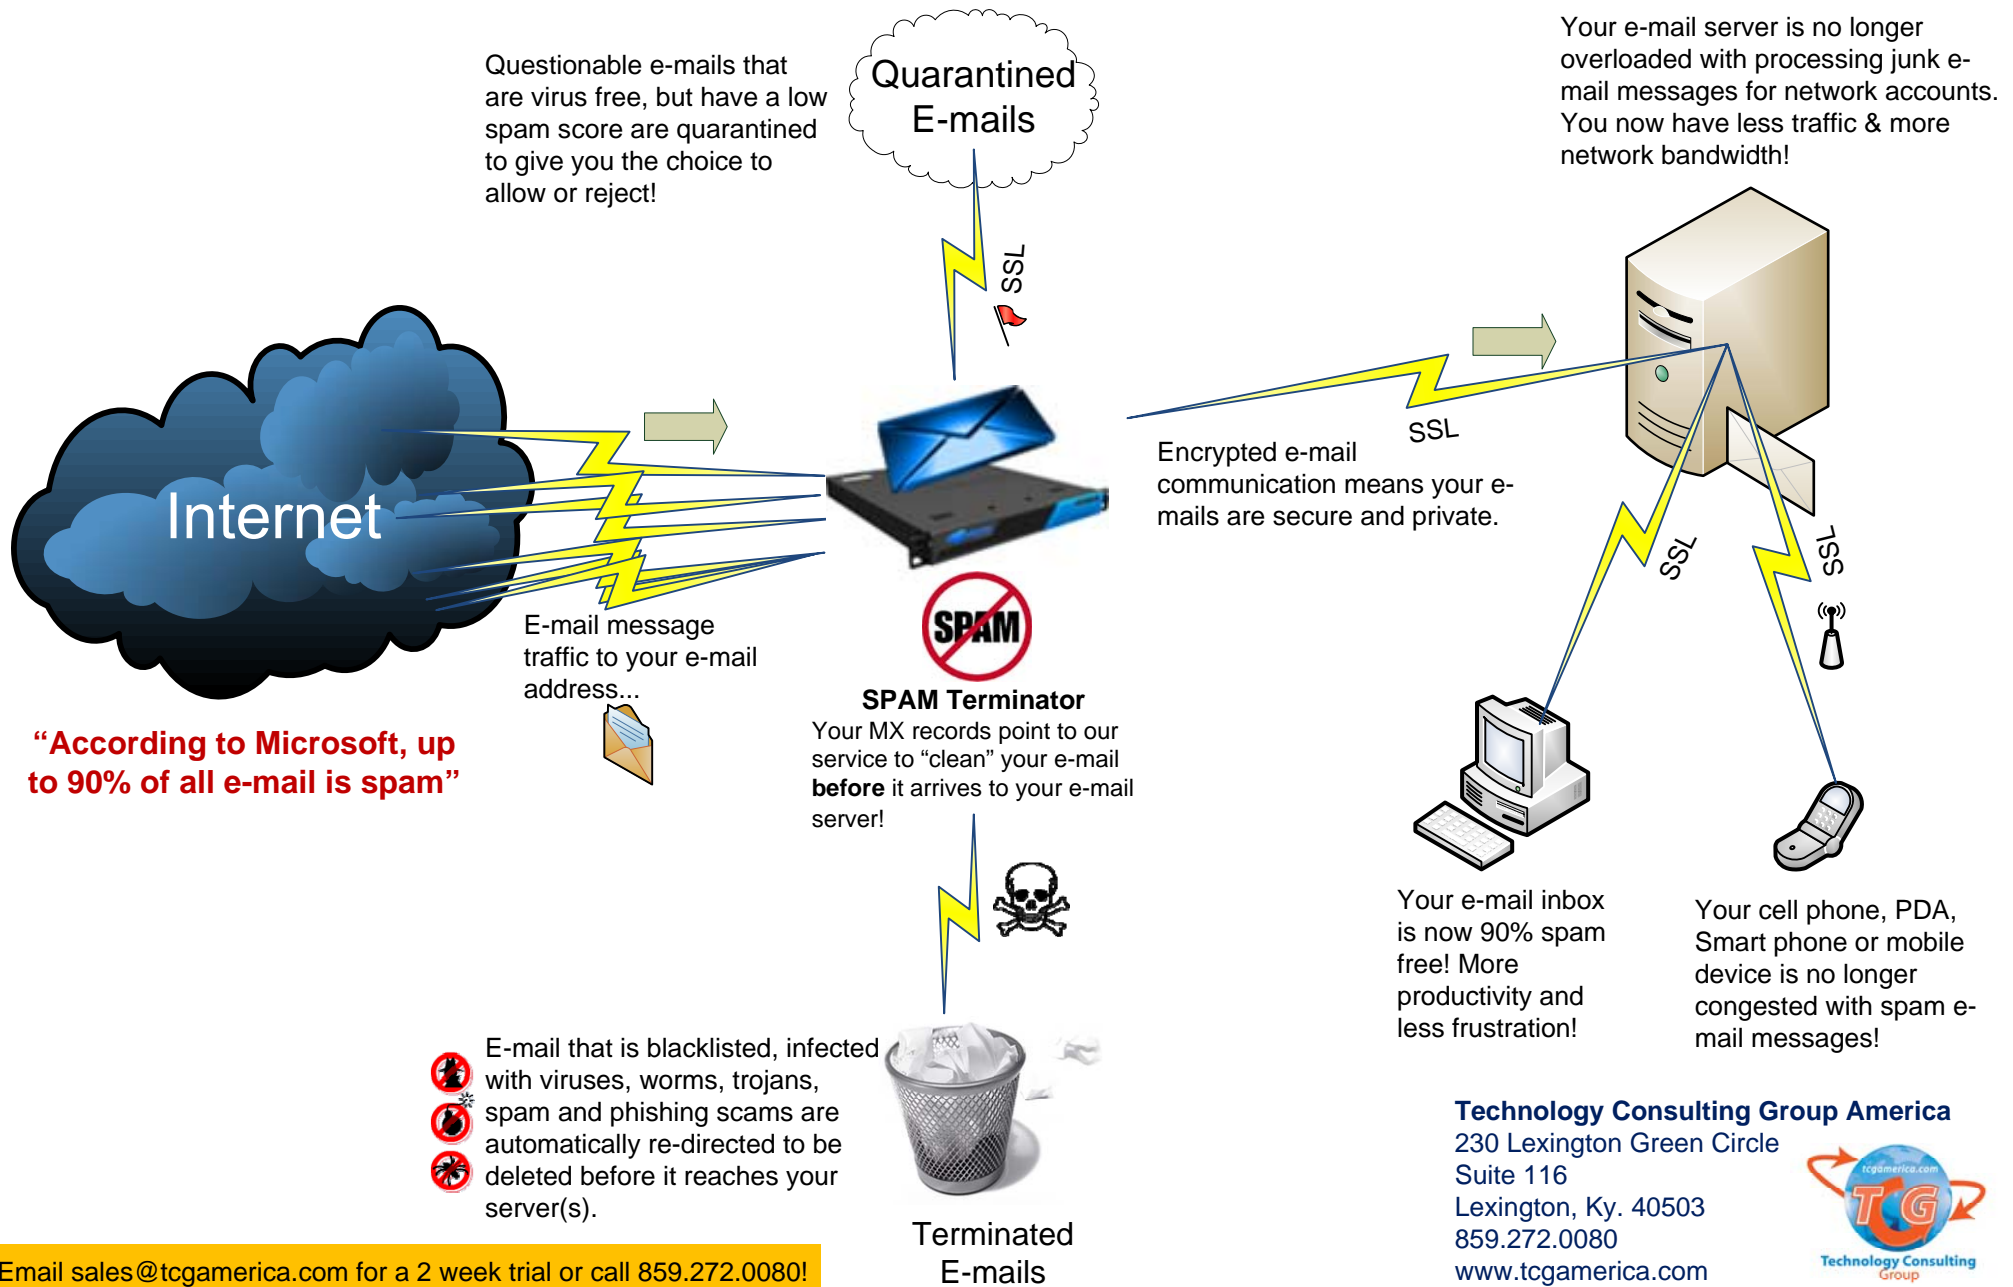

No hardware or software cost to you! Let TCG America provide your e-mail filtering thru our datacenter at a low annual or monthly fee.

Clean inboxes within 24 - 48 hours of implementation!

The Spam Terminator uses Barracuda Networks technology to safely filter out e-mail borne spam, worms, viruses, phishing and spyware attachments.
